PARTNERSHIP PACKAGE 2025-2026

UWINDSOR ROCKETRY TEAM

PARTNERSHIP PACKAGE 2025-2026

ABOUT OUR TEAM

The University of Windsor Rocketry team is an enthusiastic group of students with a passion for aerospace engineering. The team is comprised of both senior and junior engineering students working towards with the goal to design, build, and launch a rocket.

ABOUT THE COMPETITION

For the 2026 season, we will be launching in two major competitions.

At the International Rocket Engineering Competition (IREC), the world's largest student rocketry event, we'll be launching a solid-fuel rocket to a 30k ft altitude. We'll also compete at Launch Canada, with the goal to reach nearly 100k ft.

In parallel to the competition rocket, we are preparing to static fire our first liquid-fuel motor and are working towards a space shot launch to cross the Kármán line by Fall 2026.

PARTNERSHIP PACKAGE 2025-2026

ACCOMPLISHMENTS FROM PREVIOUS COMPETITIONS

Our team has experience at both IREC and Launch Canada.

The University has excelled since its inaugural competition in 2017 with some notable accomplishments. At IREC 2024, UWindsor placed 27th out of 122 teams, being the 2nd highest of the 10 Canadian teams present.

It's the support of our sponsors and community partners that have made this possible.

This package highlights the various partnership opportunities available as well as the general cost breakdowns of our process.

PARTNERSHIP PACKAGE 2025-2026

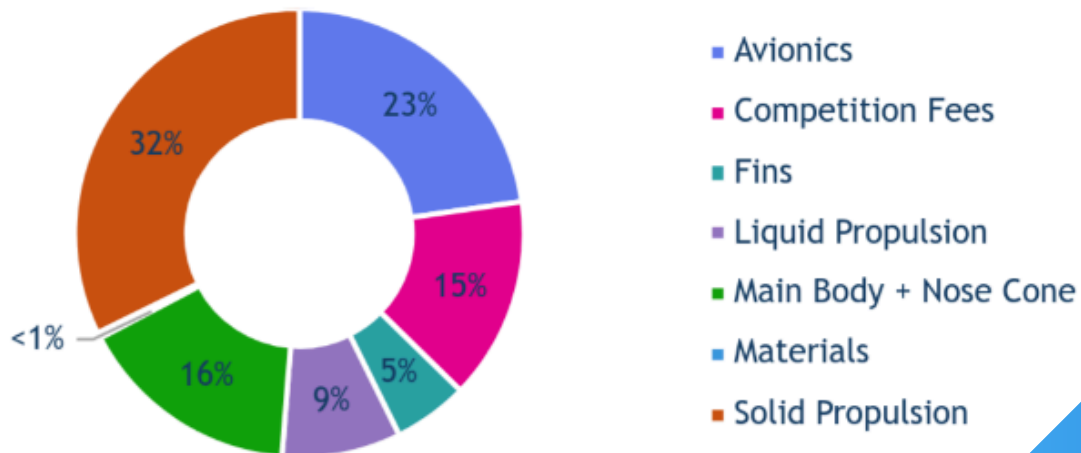

FINANCIAL SUPPORT

The support of our partners is an investment into the next generation of engineers, providing us with hands-on experience in design, fabrication, and testing. Your partnership would be the starting point of a lasting connection with these future industry professionals getting ready to launch their careers.

Note that, as a member group of a recognized educational organization, all donations to our team are tax-deductible.

Our ambitious projects can cost over \$30,000 per year in materials, manufacturing, and competition expenses. We believe financial transparency can give our partners a clear understanding on how their funding supports team operations. A breakdown on funding allocations is found below.
